

The Waite Hydrocephalus Research Student Bursary Competition 2022

The Executive Committee of the SRHSB is delighted to announce the winners of the competition for the Waite Hydrocephalus Research Student Bursaries 2022, that have been so generously funded by Richard and Jennifer Waite.

Lydia Blacklock (Manchester, UK) - **Does altered placental folate transporter expression contribute to the etiopathology of hydrocephalus?**

Nazrin Talibova (Manchester, UK) – **Cerebrospinal fluid and cerebral folate metabolism in neurological conditions**

Setthasorn Ooi (Cardiff, UK) - **Characterisation of the epidemiology, management and outcomes of congenital hydrocephalus in Africa: a scoping review**

Jeremy George (Manchester, UK; Doha, Qatar) - **Can benign external hydrocephalus be detected by simple head size measurements and distinguished from hydrocephalus?**

Ahmad Faryami (Detroit, USA) - **The quantitative analysis of flow and pressure changes through multicenter pediatric-hydrocephalus ventricular catheters Biobank**

Javier Lopez-de San Sebastian (Málaga, Spain) - **Study of MSC and NSC potential as combined therapy to recover germinal matrix affected by PHH**

We congratulate them all on their Awards!
